Compound Equations

#### Exercise 1

Determine whether each claim given below is true or false.

- **a.** Right now, I am in math class and English class.
- **b.** Right now, I am in math class or English class.

**c.** 3 + 5 = 8 and 5 < 7 - 1.

**d.**  $10 + 2 \neq 12 \text{ and } 8 - 3 > 0.$ 

These are all examples of declarative compound sentences.

e. When the two declarations in the sentences above were separated by "and," what had to be true to make the statement true?

**f.** When the two declarations in the sentences above were separated by "or," what had to be true to make the statement true?

### Example 1

Solve each system of equations. Then number line the solution

**a.** x + 8 = 3 or x - 6 = 2**b.** 4x - 9 = 0 or 3x + 5 = 2

**c.** x-6 = 1 and x + 2 = 9**d.** 3x + 2 = 8 and -4x - 2 = -10
