## Analyzing Graphs

## Review:

The graphs below give examples for each parent function we have studied this year. For each graph, identify the function type, and the general form equation; then offer general observations on the key features of the graph that helped you identify the function type.

Eduardo has a summer job that pays him a certain rate for the first 40 hours each week and time-and-ahalf for any overtime hours. The graph below shows how much money he earns as a function of the hours he works in one week.

## Exercises

1. Write the function in analytical (symbolic) form for the graph in Example 1.
a. What is the function of this graph?
b. What are the units of the graph?
c. What is the equation of the graph?
d. Explain the domain in the context of the problem?
e. What are the domain restrictions for the context?

## Identifying Functions from Tables

Review: Look at the three tables: identify what type of function is represented in the tables. Why?

| $x$ | $f(x)$ |
| :---: | :---: |
| 0 | 6 |
| 1 | 12 |
| 2 | 18 |
| 3 | 24 |

## Equations:

1. $f(x)=12 x$
2. $g(x)=-(x)(x-6)$
3. $p(x)=2^{x}$
c. The height of a certain animal's vertical leap was recorded at regular time intervals of one second; the animal returned to ground level after six seconds.
d. Melvin saves the same amount of money every month. The total amount saved after each month was recorded.

## MODELING A FUNCTION FROM A SEOUENCE

A soccer coach is getting her students ready for the season by introducing them to High Intensity Interval Training (HIIT). She presents the table below with a list of exercises for an HIIT training circuit and the length of time that must be spent on each exercise before the athlete gets a short time to rest. The rest times increase as the students complete more exercises in the circuit. Study the chart and answer the questions below. How long would the $10^{\text {th }}$ exercise be? If a player had 30 minutes of actual gym time during a period, how many exercises could she get done? Explain your answers.

| Exercise \# | Length of Exercise Time | Length of Rest Time | Total Time |
| :--- | :---: | :---: | :---: |
| Exercise 1 | 0.5 minutes | 0.25 minutes |  |
| Exercise 2 | 0.75 minutes | 0.5 minutes |  |
| Exercise 3 | 1 minute | 1 minute |  |
| Exercise 4 | 1.25 minutes | 2 minutes |  |
| Exercise 5 | 1.5 minutes | 4 minutes |  |

1) How long would the $10^{\text {th }}$ exercise be?
2) If a player had 30 minutes of actual gym time, how many intervals would they be able to complete?

Look at the sequence and determine the analytical representation of the sequence. Show your work and reasoning.

1. A decorating consultant charges $\$ 50$ for the first hour and $\$ 2$ for each additional whole hour. How much would 1000 hours of consultation cost?

| $\boldsymbol{n}$ | 1 | 2 | 3 | 4 | 5 | $\cdots$ | $n$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{f}(\boldsymbol{n})$ | 50 | 52 | 54 | 56 | 58 |  | $?$ |

2. What would be the $10^{\text {th }}$ term in the sequence?

| $\boldsymbol{n}$ | 1 | 2 | 3 | 4 | $\ldots$ | $n$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{f}(\boldsymbol{n})$ | 3 | 6 | 12 | 24 |  | $?$ |

Modeling a Function from Llata

1. Identify the type of function the each table represents (e.g., quadratic, linear, exponential, square root, etc.).
2. Explain how you were able to identify the function.
3. Find the symbolic representation of the function.
A

| $x$ | $y$ |
| :---: | :---: |
| 1 | 5 |
| 2 | 7 |
| 3 | 9 |
| 4 | 11 |
| 5 | 13 |

B

| $x$ | $y$ |
| :---: | :---: |
| 1 | 6 |
| 2 | 9 |
| 3 | 13.5 |
| 4 | 20.25 |
| 5 | 30.375 |

C

| $x$ | $y$ |
| :---: | :---: |
| 1 | 3 |
| 2 | 12 |
| 3 | 27 |
| 4 | 48 |
| 5 | 75 |

4. Plot the graphs of your data.

5. Bella is a BMX bike racer and wants to identify the relationship between her bike's weight and the height of jumps (a category she gets judged on when racing). On a practice course, she tests out 7 bike models with different weights and comes up with the following data.

| Weight (lbs.) | Height (ft.) |
| :---: | :---: |
| 20 | 8.9 |
| 21 | 8.82 |
| 22 | 8.74 |
| 23 | 8.66 |
| 24 | 8.58 |
| 25 | 8.42 |
| 26 | 8.34 |
| 27 |  |

a. Bella is sponsored by Twilight Bikes and must ride a $32-\mathrm{lb}$ bike. What can she expect her jump height to be?
b. Bella asks the bike engineers at Twilight to make the lightest bike possible. They tell her the lightest functional bike they could make is 10 lbs . Based on this data, what is the highest she should expect to jump if she only uses Twilight bikes?
c. What is the maximum weight of a bike if Bella's jumps have to be at least 2 feet high during a race?

## Linear and Quadratic Systems

1.) A system of equations is graphed on the set of axes below. What is the solution to the system of equations?

2.) What are the solutions of the system of equations shown in the graph below?

3.) What are the solutions of the system of equations shown in the graph below?

4.) On the grid below, solve the system of equations graphically for $x$ and $y$.
$4 x-2 y=10$
$y=-2 x-1$

5.) On the set of axes below, solve the following system of equations graphically and state the coordinates of all points in the solution set.

$$
\begin{aligned}
& y=x^{2}+4 x-5 \\
& y=x-1
\end{aligned}
$$

6.) On the set of axes below, solve the following system of equations graphically for all values of $x$ and $y$. State the coordinates of all solutions.

$$
\begin{aligned}
& y=x^{2}+4 x-5 \\
& y=2 x+3
\end{aligned}
$$
